B.Tech CSIT Student · Aspiring Developer

Hi, I'm Princy.

I build ideas into digital experiences.

I'm a Computer Science and Information Technology student at GL Bajaj Institute of Technology and Management. I enjoy programming, solving coding problems, designing websites and learning full-stack development to build useful digital products.

01 — ABOUT ME

A little about who I am.

Curious mind. Creative thinking. Consistent learning.

My Journey

I'm Princy, a B.Tech student pursuing Computer Science and Information Technology (CSIT). I am developing my programming fundamentals in C, C++, Java and Python while exploring web design and full-stack development.

My goal is to strengthen my problem-solving skills, create practical projects and grow into a well-rounded software developer who can turn ideas into real-world solutions.

- ✦ Quick Learner
- ✦ Problem Solver
- ✦ Creative Thinker
- ✦ Growth Mindset

EDUCATION

Bachelor of Technology

GL Bajaj Institute of Technology and Management

Branch: Computer Science and Information Technology (CSIT)

Programming | Web Development | Problem Solving

02 — TECHNICAL SKILLS

What I bring to the table.

Languages and development areas I'm learning and practising.

C Programming

Building programming fundamentals, logical thinking and an understanding of data structures.

Programming

C++

Practising problem-solving, object-oriented concepts and writing structured code.

OOP & Logic

Java

Learning object-oriented programming and core Java concepts for software development.

Core Java

Python

Exploring Python syntax, programming logic and solutions to computational problems.

Programming

Web Designing

Creating responsive layouts with attention to colours, typography, usability and user experience.

HTML · CSS · JavaScript

Full Stack Development

Exploring frontend, backend and databases to understand how complete web applications work.

Development

My Technology Stack

A snapshot of my programming and web-development toolkit.

C | C++ | Java | Python | HTML5 | CSS3 | JavaScript | Git & GitHub | Responsive Design

Skill labels represent areas of learning and practice, not verified proficiency ratings.

03 — PROJECTS & PRACTICE

Learning by building.

Explore my coding journey and discover what I'm working on.

01

Programming Practice

Improving coding logic and problem-solving through practice with programming languages and algorithmic challenges.

02

Web Development Portfolio

A personal website to showcase my introduction, education, technical skills and developer profiles with a responsive design.

Explore LeetCode ↗

Explore My GitHub ↗

03

Full Stack Learning

Exploring how frontend interfaces connect with backend logic and databases to create useful web applications.

View My GitHub Profile ↗

04

Let's Build Something

I'm looking forward to creating more projects, collaborating with other learners and turning new ideas into working software.

Connect With Me ↗

04 — WHAT MAKES ME DIFFERENT

More than just writing code.

The mindset I want to bring to every project and opportunity.

✦ Logical Thinking

I focus on understanding problems and breaking them into manageable steps.

✦ Design & Creativity

I value clean interfaces, thoughtful colours and a better user experience.

✦ Continuous Learning

I aim to improve through coding practice, projects and learning new technologies.

05 — CONTACT & CONNECT

Let’s create something awesome.

Interested in collaborating, discussing technology or sharing development ideas? Connect with me through my profiles.
